## The Student Side

### Matching, questions, applications, and more.

It can be a lot to manage, especially while juggling a volume of responsibilities. But what does it really all mean? Where can a student find questions to begin answering? What sort of questions can they expect? How do matches appear in a student's account? And what does an application take?

These are questions you may not be asked on a daily basis. However, when we understand how applications operate and what that translates to in a student's experience, it can be so much easier to assist, coach, and answer questions. This week's training videos, [Part 1](#) and [Part 2](#), will take you through scholarship universe as a student; as you have likely encountered, leading someone through something you've experienced yourself allows for guidance that is a whole lot more authentic, comprehensive, and ultimately gratifying for us and our students. Hope you enjoy!
