Using Atomic Learning Skills Assessments

In addition to requiring students to watch video tutorials for a grade, you can require them to take a skill assessment on the videos they have watched.

**Optional Step: Create a Link on the Left Menu to Hold Videos and Assessments**

Click the button to add a “Content Area” to the left menu. Check the “Available to Users” box and then click the “Submit” button. (If you do not want to add the link to the left menu, you can simply go into a content area, such as “Week 4” and follow the same instructions below.)

The link will appear at the bottom of the left menu list. Click the link you just added.

Once in your new content area, click the Build Content button. Select “Atomic Learning” from the list.

**Configuration Step One: Grading Options**

You could have Atomic Learning automatically send a grade to the Grade Center for each student who takes the skills assessment. You can adjust the points possible.

Give the page a name. In this case, it is called “MS Excel Skills Assessment.”
By default, all of the boxes for grading are checked. You may want to adjust the number of points possible, as it is 100 point by default. When finished, click the “Submit and Select Training” button to proceed.

Configuration Step Two: Search for the Skills Assessment

Click on the “Skills Assessments” tab at the top of the page.

Click the drop-down to search through the list of skills assessments in which you want to use.
You may get another drop-down list to select an assessment on a particular item in the series. Click the “Submit” button when you are ready to proceed.

Check for Accuracy: Part One

You can log in to Blackboard as a “Test Student” to take the assessments. Click on the “Skills Assessment” link to get started.

Click on the play button to take the assessment.
In this example, there are 6 questions. The questions are being pulled from a pool of questions and students will get different questions each time they take the assessment. There is not a setup option to allow the student to take the test multiple times, so they will get a message saying the assessment has already been taken if they try to take it again.

Modifying a custom cell style

Select the first step that would be necessary to modify a custom cell style.

- A) Click Modify in the shortcut menu.
- B) Right-click on the style to change.
- C) Navigate to the Cell Styles menu.
- D) Apply your formatting changes.

Check for Accuracy: Part Two

Next, log in to Blackboard as yourself, the instructor, and check the “Full Grade Center” to ensure the Test Student received points for taking the assessment.
